تجربه‌های کاری

Backend Developer

فروردین ۱۴۰۰ تا حالا | Ipaam

Ipaam company provides a set of services related to the use of information technology, focusing on the tourism and financial industries. Website: ipaam.ir

- Transitioned the system architecture from monolithic to microservices, deploying 20+ Golang services: channelead.ir, farazcrs.ir, bedcasting.ir, apro.ir, semega.ir.
- Worked with REST API and gRPC to create efficient backend services.
- Implemented a Concurrency strategy in Golang book engine service, unified supplier outputs, and delivered integrated hotel and flight inventory responses, increasing data processing speed by 40% and reducing API calls by 25%.
- Deployed Krakend for gateway management, FusionAuth for user authentication, and Temporal for workflow orchestration; enhanced microservices coordination by 35%, tracked request history with Jaeger, and ensured scalable storage with MinIO.
- Engineered robust database architecture using PostgreSQL and MySQL; incorporated MongoDB for handling group payment pipeline requests and leveraged Redis to reduce database communication frequency, increasing query efficiency by 40%.
- Configured background tasks with Supervisor and Rabbitmq to manage multiple job queues efficiently.
- Using the Saga pattern for operations that are performed sequentially and we need to know the status of each stage of the work and the state before and after it.
- Developed secure, scalable, and encrypted integrations for key Financial services such as Shahkar, PAYA, SATNA, SAMAT, Customer Deposit, installment Payment services, and other banking operations.
- Experienced in writing a small service for payment gateway through cryptocurrency like Bitcoin and ETH.

برنامه‌نویس Back End

فروردین ۱۳۹۹ تا فروردین ۱۴۰۰ | soshyant

Backend Developer

Jibimo provides a secure and easy platform for mobile money transfers so that everyone can conduct their financial transactions at any time without needing to visit a bank. Website: soshyant.co

- Developed and maintained backend systems using Laravel for daily bug fixing, enhancement, and troubleshooting.

- Utilized Docker for service deployment.
- Maintained and developed a system using the Event Sourcing design pattern, which includes several stages and benefits that enable the creation of reliable systems that track data changes as events.
- Used Agile and Scrum methodologies and have experience with JIRA to optimize project efficiency and enhance task management.
- Carried out database testing, functional testing, and behavioral testing.

برنامه‌نویس Back-End

turpal | فروردین ۱۳۹۸ تا فروردین ۱۳۹۹

Turpal is an application designed to provide travelers with essential information about hotels and tourism services. The backend of this application was implemented as microservices using Golang, Node.js, and Laravel. Website: turpal.com

- Conducted significant refactoring of legacy code, improving code quality and maintainability.
- Responsible for developing backend layers in Lumen and integrating third-party APIs.
- Documented all work related to API implementation to ensure transparency and ease of future reference.

برنامه‌نویس Back-End

visit24 | فروردین ۱۳۹۷ تا فروردین ۱۳۹۸

The Visit is a location-based application available in two different versions: one for therapists and the other for patients. This allows therapists to provide healthcare services to patients across various fields. Application download link: <https://cafebazaar.ir/app/com.visit24.patient>

- As a member of the backend team, I was responsible for developing backend systems using the Laravel framework.
- Focused on reducing code duplication and increasing test coverage to improve overall code quality.
- Utilized MinIO for scalable and secure storage, Redis for caching and Gespacial data search, and MySQL as the primary database system.
- Implemented FCM for sending notifications to Android and panel users, and APN for sending notifications to iOS users.
- Demonstrated teamwork and effective communication with other team members and stakeholders

سوابق تحصیلی

کارشناسی ارشد - مهندسی کامپیوتر

دانشگاه سراسری خوارزمی | ۱۳۹۳ تا ۱۳۹۵

کارشناسی - مهندسی کامپیوتر (ترم افزار)

دانشگاه سراسری خوارزمی | ۱۳۸۹ تا ۱۳۹۳

رتبه اول و استعداد درخشان در دانشگاه خوارزمی
