

Daniel Najafi

Product Strategist

درباره من

Hi, My name is Daniel Najafi, I graduated from San Jose State University, California, in Business Marketing major. I've been working for Google where I've been managing a team of 4 Googlers who are in charge of R&D for Google Beta Products that are coming up within next 5 years. I really enjoy working with my team because our core value is collaboration, as well as growth within the team and individually. Also we get a chance to work on very amazing products that would shape the future.

I'd be happy to join a team where I can utilize my research, analytical and strategic skills in order to improve the team and the company.

Best,
Daniel
