

# مصطفی قریشی

Devops engineer

## درباره من

I have been working in the IT field for 5 years, during which I have consistently pursued learning and hands-on experience. I've remained dedicated to my work and actively explored new technologies. I began my career with a focus on Microsoft technologies, then expanded my knowledge through academic programs in CCNA and firewalls. Later, I developed a strong interest in VMware and decided to focus my career on VMware technologies. For the past 3 years, I have been working specifically in the field of virtualization.

In addition, I have 1 year of experience working with various DevOps tools. This includes installing and managing Linux systems, setting up and using Git, installing and managing Docker, and working with Kubernetes. I have also installed and used Ansible for automation, as well as set up and managed GitLab, including creating and managing jobs and pipelines. Furthermore, I have installed and managed Jenkins for CI/CD workflows.

## تجربه‌های کاری

### کارشناس شبکه

شرکت لوازم خانگی پارس | فروردین ۱۳۹۸ تا مهر ۱۴۰۰

### کارشناس

بانک مسکن | مهر ۱۴۰۰ تا آبان ۱۴۰۲

کارشناس مجازی سازی

### کارشناس فناوری اطلاعات

ملل بانک | آذر ۱۴۰۲ تا حالا

## سوابق تحصیلی
