I'm open to work for Technical lead position. with 7 years of experience in software engineering, specializing in Backend, DevOps, and frontend development using languages such as Golang, Java, and JavaScript. Proficient in utilizing tools like Golang, SpringBoot, Jenkins, OracleDB, NextJs, ReactJs, Docker, and MongoDB for overseeing, developing, and troubleshooting CoreBanking and CMS services (currently). Skilled at code reviews, planning sessions, and ensuring high-quality deliverables to the product team

My Skills you may be interested in:

- Providing technical guidance and leadership to drive project success
- Developing, testing, and delivering high-performance, maintainable code
- Enhancing onboarding processes for new team members
- Conducting regular technical knowledge and communication skill enhancement sessions for team members

What am I good at?

leading and mentoring development teams, collaborating with stakeholders, guiding technical discussions, code reviews, identifying performance bottlenecks, promoting innovation, participating in recruitment efforts, and fostering effective communication across cross-functional teams.
