همینطور میتوانید از طریق جابینجا رزومه پیوستی که براتون ارسال کردم رو ببینید.

I am able and keen on learning everything

I have great knowledge and skills in WordPress site design and have worked with most of the public WordPress themes and plugins – I have mastered User Interface Design (UI), User Experience Design (UX) and SEO

I learned all the necessary skills for the front end. But I want to get acquainted with the challenges of the labor market. As a front-end developer, I expect mentoring, consulting and providing an environment for progress

What kind of team i would like to work in: a job is ideal where I can learn new things every day and face cool challenges. It is possible to grow and learn. if your company provides mentoring, training, advice, and support. I have a great desire to cooperate with you

You can see all work experience, hear reviews from previous clients and read more about me at Farideghbali.com

تجربه‌های کاری

UI Designer – UI Developer

Freelancer | شهریور ۱۳۹۷ تا فروردین ۱۳۹۸

My simultaneous interest in art and technology led me to start user interfaces Designer(UI Designer) and that was the beginning of my career. (I completely master user interface design(UI), Basics of design and Figma, Photoshop, Adobe XD softwares) Since then I have always dealt with the user interface and love it. then i became a ui developer. A user interface developer means someone who develop UI with HTML & CSS and related frameworks without much use of JavaScript frameworks or converts PSD files to HTML. also, I learned develop website with WordPress And I developed great websites

Junior WordPress developer

articher | فروردین ۱۳۹۸ تا شهریور ۱۳۹۸

Articher is an online educational platform that provides educational materials in the field of home skills(Handicrafts, sewing). I worked as a junior developer. In this course, not only did we have a good organizational growth, but I experienced a good personal growth, i gained many skills, including WordPress specialized skills, problem solving skills and knowledge, negotiation and etc, while working. The initial goal of the Articher website was

to develop the website, which we achieved with the great effort of the team. I was responsible for zero to one hundred website development issues.

Mid-Level WordPress developer

۱۴۰۰ مهر | Fotofan تا ۱۳۹۸ مهر

I worked as a mid-level WordPress developer. In addition to website development and SEO, I was in charge of teachers' activities as well. at this time, the website was developed as a multi-vendor and its income and visits have acceptably increased. I have well trained more than 50 instructors well and also my technical skills were enhanced by the many challenges I faced. I had a great opportunity to figure out novel ideas and implement them, which later proved to be beneficial to the company.

Senior WordPress developer | junior frontend developer

شرکت خلاقانه کمان آرون | مهر ۱۴۰۰ تا آبان ۱۴۰۱

I worked as a senior WordPress developer and junior front-end developer in this company. During this period, I experienced great advancement and I was interested in learning new skills. I was able to lead the team well during this time and delivered creative designed and well developed websites to client. I am very skilled in using WordPress plugins. And the employer was relieved that we would not have any bugs

Senior WordPress developer | Mid-level frontend developer

mealsy.ca | مهر ۱۴۰۰ تا حالا

I am working remotely as a senior WordPress developer and mid-level Frontend developer. At the very beginning, I adapted myself to the team very quickly and dedicated several hours daily learning the necessary and practical skills (at my free time). Time management and teamwork are the skills I have learned during this time. My high speed in web design, and the ideas I had for automation made the employer add several people to the sales team, and the total number of projects completed per month increased significantly. During this time, I faced international challenges, solving these challenges gave me a lot of experience.
