

# حسین داداشی

## FullStack Developer

### درباره من

A detail-oriented Full-Stack Developer with a strong track record in designing and building scalable, high-performance web applications. Proficient in Nuxt.js, Vue.js, .NET Core, SQL, and modern cloud technologies. Passionate about solving complex challenges and creating intuitive, user-focused solutions. Continuously seeking opportunities to learn and master emerging technologies to stay ahead in a fast-evolving tech landscape.

### تجربه‌های کاری

#### Data Architect

ناواکو-بانک مسکن | دی ۱۳۹۸ تا اسفند ۱۳۹۹

1. Ensured database security and compliance by implementing role-based access, auditing, and encryption using SQL Server security features.
2. Created and maintained comprehensive documentation for data models, dictionaries, and data flow diagrams, enhancing data governance and onboarding.
3. Collaborated with business analysts and stakeholders to define data requirements and translate them into scalable schema designs.

#### Frontend Developer

کارگزاری فارابی | شهریور ۱۴۰۰ تا آبان ۱۴۰۱

1. Built reusable and modular Vue.js components, accelerating development cycles and reducing code duplication across projects.
2. Implemented Vuex for complex state management, improving maintainability and reducing API calls by over 50%.
3. Led frontend architecture planning and best practices adoption in Vue.js projects, ensuring scalability and code quality.
4. Worked closely with UI/UX designers to translate Figma prototypes into pixel-perfect, responsive interfaces with Vue.js.
5. Utilized Git for version control across all projects, enabling efficient collaboration, code management, and streamlined feature branching in Agile workflows.

#### FullStack Developer

مهندسی سیستم یاس ارغوانی | آبان ۱۴۰۲ تا حالا

1. Successfully migrated a legacy frontend Vue.js v2 architecture to v3, improving application performance by 40%.
2. Integrated Redis (RedisStack) into the high-traffic BasicInfo service, which centralizes core data such as employees, gas stations, and bank branches for use across multiple projects; improved endpoint performance by 3.5x, significantly enhancing response times and scalability.
3. Led a team of two junior developers in a major .Net and Vue.js project, ensuring timely delivery and high-quality code standards.

4. Integrated a third party API service into an existing Vue.js application, resulting in a 20% increase in operational efficiency via TanStack Vue-Query.
5. Optimized Entity Framework Core queries by Caching Repetitive Queries, reducing query execution times by up to 40% in high-traffic endpoints.
6. Ensured responsive design across devices by implementing adaptive layouts and mobile-first principles in Vue.js applications, enhancing user experience on all screen sizes.
7. Participated actively in bi-weekly code reviews, setting a benchmark for best practices and ensured optimal code coverage.
8. Implemented CI/CD pipelines Azure DevOps, reducing deployment time by 70% and eliminating manual errors.
9. Configured and maintained IIS for hosting ASP.NET Core applications, enabling secure and reliable deployment in production environments.
10. Built a background job scheduling system using Quartz.NET, enabling reliable execution of recurring tasks like report generation, data synchronization, and SMS dispatching.
11. Developed and maintained RESTful APIs and SPA integrations using ASP.NET Core and Vue.js, enhancing performance and user interactivity across services.
12. Implemented logging and monitoring using Serilog and Application Insights, improving observability and incident response time.
13. Collaborated in an Agile team using Azure DevOps for sprint planning, code reviews, and automated build deployments.
14. Utilized Git for version control across all projects, enabling efficient collaboration, code management, and streamlined feature branching in Agile workflows.

## FullStack Developer

Swanox Co. | شهریور ۱۴۰۳ تا اردیبهشت ۱۴۰۴

1. Developed dynamic, SEO-friendly web applications using Nuxt.js 3, resulting in a 45% increase in organic traffic and improved Google indexing.
2. Optimized Nuxt3 application performance with lazy loading, code splitting, and SSR (server-side rendering), leading to a 35% faster initial load time.
3. Implemented CI/CD pipelines with GitHub Actions, reducing deployment time by 60% and integrated them with cloud-based deployments.
4. Implemented secure third-party authentication via Firebase, enabling Google and Facebook login support to streamline user access and improve onboarding experience.
5. Deployed and maintained Nuxt.js and .Net Core applications on a cloud-based Ubuntu server, configuring Nginx and PM2 for production-grade performance and uptime.
6. Configured SSL certificates on a cloud-based Ubuntu server using Nginx, securing Nuxt.js applications with HTTPS and improving SEO and user trust.
7. Customized Nuxt.js routing and middleware to support role-based access control, enhancing security and user-specific content delivery via Navigation Guards in Vue Router.
8. Ensured responsive design across devices by implementing adaptive layouts and mobile-first principles in Vue.js applications, enhancing user experience on all screen sizes.
9. Configured static site generation (SSG) in Nuxt.js, allowing lightning-fast page loads and simplified deployment to Cloudflare CDN platform.

10. Implemented SSR caching with LRU-cache and Vue meta tag management, significantly improving Lighthouse scores and page speed rankings.
11. Implemented the CQRS (Command Query Responsibility Segregation) pattern using MediatR within an Onion Architecture in a .NET Core application, enhancing modularity, maintainability, and separation of concerns.
12. Utilized Git for version control across all projects, enabling efficient collaboration, code management, and streamlined feature branching in Agile workflows.

## سوابق تحصیلی

### کارشناسی مهندسی صنایع

دانشگاه تهران | ۱۳۹۲ تا ۱۳۹۶

بورسیه بنیاد حامیان دانشگاه تهران

### کارشناسی ارشد مهندسی صنایع

دانشگاه صنعتی شریف | ۱۳۹۶ تا ۱۳۹۸

عضو بنیاد ملی نخبگان
